

# NILOY CHAKRABORTY

Master's Student At University of Stuttgart and Student@Bosch

+49-15171684000 Allmandring-24-c, Zi-20802 70569 Stuttgart  
chakrabortyniloy2018@gmail.com https://github.com/Niloy-Chakraborty

## EXPERIENCE

### Working Student

#### Koena-tec GmbH

Oct 2020 – Present Stuttgart, Germany

- Data collection from Coffee Machine consumption for a Smart Plug product.
- Implemented Machine Learning and Deep Learning for classifying different order categories from consumption data.
- Clustering analysis for order data analysis.
- Future consumption prediction using Composite LSTM Autoencoder.

### Intern in Predictive Analytics

#### Robert Bosch GmbH

March 2020 – Aug 2020 Stuttgart, Germany

- Log data parsing and Process Mining of the in-house Software (myMBR) to bring insights from data
- User Journey analysis through Process Analytics and finding the bottlenecks.
- Development of Purchase Order Denial Model using Machine Learning Techniques.
- Writing Test Cases for the development team.

### Student Assistant

#### Fraunhofer IAO

Feb 2019 – Dec, 2019 Stuttgart, Germany

- Time-series data analysis of Smart Meter data for a smart energy system project.
- Time-series stream clustering using different Machine Learning Techniques for Smart Energy Systems.
- Building a Web Application for showing the results.

### Scientific HiWi

#### IAAS-University of Stuttgart

July 2019 – Dec, 2019 Stuttgart, Germany

- Building data flow pipeline for smart data-centers.
- Implemented real-time data monitoring using InfluxDB.

### System Engineer

#### AI For Networks Lab, Tata Consultancy Services Limited

July 2017 – Sept 2018 Hyderabad, India

- Developed different Business Solutions and Proof of Concepts using Machine Learning and Deep Learning Techniques.
- PoCs Developed: IP Network Anomaly Detection, Cognitive KPI Prediction, Network Traffic Classification.

## EDUCATION

### M.Sc. in INFOTECH

#### University of Stuttgart

Oct 2018 – Ongoing Stuttgart, Germany

### B.Tech. in Electronics and Communication Engineering

#### Maulana Abul Kalam Azad University of Tech.

Aug 2012 – May 2016 West Bengal, India

## TECHNICAL SKILLS

Deep Learning Machine Learning  
Software Engineering

Python  
Java  
C  
VBA

TensorFlow  
Keras  
Scikit-Learn  
Matplotlib

HTML 5  
CSS  
JavaScript  
Plotly.js

Flask  
RabbitMQ & MQTT  
InfluxDB  
MySQL

## OTHER SKILLS

Linux  
CI-CD Pipeline: Jenkins  
MS Excel  
Agile  
Version Control: Git  
Raspberry Pi

## EXPERIENCE

### Assistant System Engineer

#### Tata Consultancy Services Limited

📅 October 2016 – June 2017    📍 Hyderabad, India

- Web Application development using HTML, CSS, JavaScript
- Java/ Python based back-end development.
- Writing test cases for the softwares

### Undergraduate Research Intern

#### National Institute of Technology, Sikkim

📅 April 2014 – June 2016    📍 Sikkim, India

- Designed Photonic Crystal Antenna between the range of 200THz and 210THz using CST studio

## SELF-PACED PROJECTS

### Website Saliency Prediction 🔗

- A study of web-page saliency using FiWi dataset (only 149 images).
- A VGG-16 based Fully Convolutional Neural Network with skip connection was implemented to predict the Human attention map of the Webpages.
- A 2 stage Transfer Learning process was used to compensate the lack of training data and the results were compared with the top saliency models.

### My Smart Home Garden 🔗

- A gardening system (Watering, Lighting, and Plant Identification) was automated, which could be operated using Telegram bot.
- Cloud based data storage through Message Queuing for sensor and weather data, which could also be visualized in Telegram bot.
- An AI planning model was developed for automatic watering and lighting.
- CNN based plant name and health identification models were developed.

### Real Time Data Monitoring System 🔗

- This project shows an end-to-end data flow pipeline via RabbitMQ and InfluxDB for sensor/ network KPI data.
- The data can be visualized via Chronograf in Real-Time for further analysis

### Time Series Stream Clustering for Smart Meter Dataset 🔗

- This project implemented a prototype of the time-series clustering of the London Smart Meter Dataset using various Machine Learning algorithms, like K-means, Hierarchical clustering, and Auto encoder.
- The clustered groups were visualized for better insights of the data.

### Model Based Test Driven Development

- An approach for developing faster Regression test suites and also in executing multiple test cases with less manual intervention
- It uses Finite State Machines for visual representation of test cases.
- It also has features like tree visualization of the yang files, python code editor for writing test cases, syntax checker, graph editor etc.

### Pima Indian Diabetes Classification 🔗

- In this project, the Pima Indian Diabetes dataset has been classified using the Random Forest classifier.
- Although the initial accuracy was 74%, it has been increased to 79% using Feature Selection technique.

## PUBLICATIONS

- IP Network Anomaly Detection using Machine Learning, *IEEE Conference Paper ( I2CT 2019)* 🔗
- Whale Optimization Algorithm: An Implementation to design low-pass FIR Filter, *IEEE Conference Paper ( iPACT 2018)* 🔗
- Design of IIR filter Using Gbest Guided Cuckoo Search Algorithm, *IEEE Conference Paper (ICCECE 2016)* 🔗
- Design of Higher order FIR Low Pass Filter using Cuckoo Search Algorithm, *IEEE Conference Paper ( ICCSP 2016)* 🔗

## CERTIFICATIONS

- "Building Deep Learning Models with TensorFlow" by IBM-Coursera 🔗
- Learning Python for Data Analysis and Visualization" by Udemy. 🔗
- "Hadoop Fundamental (Hadoop 101)", by BigDataUniversity. 🔗
- BSNL EETP course on Telecom Infrastructure by BSNL, India, held from 1/6/2014 to 23/07/2015 including Silver, Gold and Platinum certificate.

## HONORS & AWARDS

- Recommended for Student@Bosch program for outstanding performance during Internship
- Won various awards (On the Spot, Special Initiative award, etc.) during my Full time job for my contribution in the R&D
- Honoured with textbhVIDYASHREE titled award for outstanding performance in the 10th Grade, from Amul Group, India
- Awarded for serving as Placement Coordinator during Undergrad.
- Received Scholarship from All India Council for Technical Education for National Level Training Program in Telecom. Infrastructure.

## LANGUAGES

English  
Hindi  
German

## INTERESTS

Singing

Watching Movies

Socializing
